3D CAMOUFLAGE ALUM.TUBE SPEARGUNS

CARBON FIBER TUBE RUBBER SPEARGUNS

2016 Year – New Product

3D CAMOUFLAGE ALUM.TUBE SPEARGUNS

The FINEST quality range of 3D CAMOUFLAGE alum. Tube and

CARBON FIBER TUBE RUBBER SPEARGUNS

The TOP quality range of CARBON FIBER tube is made from the finest materials by 3K carbon cloth.

Rubber spearguns use the stronger latex band as a spring to propel a piston down the barrel to launch the spear shaft at highest velocity. The speargun body is made of glass-fiber plus reinforced nylon and TPR gripped handle in red color. All of the speargun spear shafts in diameter 7.0mm are made of stainless steel materials.

When the rubber speargun is re-loaded by inserting the spear shaft and pushing it down the barrel with the latex band in readiness for the next shot. Because the spear travels from within the barrel it is less likely to wander off target giving greater accuracy. These guns are highly reliable and require very little maintenance other than thorough washing with clear water when not in use.

Special 4 New Concepts

New TOP quality enclosed insert plate (stainless steel) for guide shaft to shoot the accuracy of your target.

New TOP quality notch catch (stainless steel) to prevent smooth from the spear shaft during use.

New TOP quality (stainless steel) mechanism triggering to prevent the long last friction use. Use the stainless steel wishbones to match the stronger strength from the latex bands.

Speargun knife can be used as one more function to attach to the handle.

Colors combination in assorted TPR gripped handles as per your option.

3D CAMO TUBE RUBBER SPEARGUNS

CARBON FIBER RUBBER SPEARGUNS

Diameter : 28 mm Colors Black combination in assorted sizes are available in
